

Aadarsh Natarajan

Phone No: (703) 853-6643 ♦ Email: aadarsh.natarajan@gmail.com ♦ U.S. Citizen

OBJECTIVE

Pursuing software engineering opportunities to build secure, scalable and innovative solutions leveraging my background in software development, AI and machine learning

EDUCATION

University of Virginia

Charlottesville, VA

BS Computer Science

Sep 2022 - May 2026

- **GPA:** 3.74 | **Honor:** Dean's List
- **Relevant Coursework:** Software Engineering | Internet-Scale Applications | Database Systems | Data Structures and Algorithms | Computer Systems and Organization | Computer Vision | Probability | Cybersecurity | Game Design | Discrete Math

TECHNICAL SKILLS

Programming Languages: Python | Java | C++ | R | JavaScript | HTML

AI: TensorFlow | Keras | Scikit-learn | ChatGPT | LangChain | Llama2 | MistralAI | Refining LLM Output via Prompt Engineering | Multi-shot Prompting | Chain of Thought Prompting

Tools: Git/Github | SQL | Django | Flask | Gradio | Docker | Apache JMeter

Certificates: Introduction to Generative AI | NLP: Twitter Sentiment Analysis | Prompt Engineering for ChatGPT | Intro to MistralAI | LangChain: Application Development Essentials

EXPERIENCE

Nola Builds

Charlottesville, VA

Artificial Intelligence Intern

Summer 2025

- Worked with stakeholders to elicit business requirements for increasing workflow efficiency during large construction projects
- Researched and deployed agentic AI tools for task automation to improve workflows. Reduced project estimation and material supply ordering process from over a 1 week to a few hours per project
- Created a framework for evaluating AI software for operations

Solution Delivery Division, Defense Health Agency

Falls Church, VA

Generative Artificial Intelligence Intern

Summer 2024

- Built a chatbot with a GPT-4 and RAG pipeline using LangChain; deployed via Gradio GUI
- Transitioned codebase for long-term team use and presented the chatbot to stakeholders (end users, subject matter experts, and project sponsors)
- Gained experience applying LLMs for summarization, retrieval, sentiment analysis, and translation

Financial Risk Group (FRG)

Cary, NC

Software Engineering Intern

Summer 2023

- Built ML models with TensorFlow/Keras to predict loan default losses and financial trends using Gated Recurrent Unit and Long-Short Term Memory neural networks
- Produced client-facing documentation and visualizations using R Markdown and LaTeX

PROJECTS

- **Hoo Knows History** — Created an AR app that provides a tour of UVA's campus
- **Student Game Developers** — Directed and worked on various games in the club at UVA
- **Music Instrument Classifier** – Designed a CNN in Python achieving high accuracy in classifying instruments from audio samples
- **AI Othello Player** – Developed a Python AI that plays against human users using heuristic search
